**Subject:** CFAC draft talking points-riverbank protection

Hey Mike,

Here is first-stab draft statement in prep for possible questions regarding CFAC erosion from Flathead River. You probably have some talking points ready with your site team. Just thought I throw this out in case we get press. Let me know your thoughts and changes. Thanks. Hope you have a good weekend.

EPA, DEQ and CFAC are aware of the erosion concerns of the riverbank. CFAC will be taking measures to increase the stability of the riverbank to protect parts of the site from potential erosion. Initial measures are scheduled to be installed before spring (not sure if we have examples? Biotechnical?). Additional long term measures are also being considered. EPA and DEQ are working closely with CFAC to address any potential riverbank erosion risks on the site.
